Badii Orthodontics Expands Into Irvine, CA

IRVINE, CA – Badii Orthodontics has expanded its presence into South Orange County by opening a new office in Irvine. As one of a few doctors nationally, Kevin Badii, DDS, MDS provides orthodontic treatment with braces behind the teeth... ie. they're 100% invisible!

"As an Irvine resident, it's a pleasure and honor to proudly serve my neighbors, The Great City of Irvine and South Orange County" states Kevin Badii, DDS, MDS, owner of Badii Orthodontics. "Badii Orthodontics has been positively changing smiles and changing lives in Southern California for many years, and we're very excited about expanding into Irvine!"

The Irvine office is Dr. Badii's third location and the second in Orange County. Conveniently located in the heart of Irvine at 14370 Culver Drive, Suite A in Heritage Plaza, Badii Orthodontics' Irvine location will take your breath away. From multiple Sony Playstation 3s in the arcade, to numerous 50" HDTV's in the treatment area, to the deliciously appointed reception area; there is truly something for everybody. With beautiful and modern esthetics, the new location provides a relaxing atmosphere that makes each patients experience comfortable and enjoyable. All the equipment and materials used in the office are cutting-edge, resulting in faster, more efficient orthodontic treatment. The state-of-the-art technology, combined with the variety of orthodontic treatment offered by Dr. Kevin Badii, provides patients with a high level of flexibility and convenience.

Dr. Badii is now scheduling appointments in the Irvine with a special grand opening offer of a complimentary consultation and \$500 off full lingual treatment.

Badii Orthodontics is the local orthodontic practice of Dr. Kevin Badii and has served the residents of North Orange County and South Bay Los Angeles with attentive, compassionate and personalized care. Within his practice, Dr. Badii uses the latest technological advances in the industry, such as lingual braces (100% invisible braces behind the teeth), self-ligating brackets, Invisalign®, and traditional metal and ceramic braces, along with the latest in computer technology and digital x-rays to ensure that patients receive the most effective care possible. For more information about Dr. Badii's offices and orthodontic treatment, visit www.BadiiOrthodontics.com.
