Dr. Kevin Badii

Badii Orthodontics

His relentless pursuit for excellence has earned Dr. Kevin Badii many distinctions in his personal and professional life. From receiving a full football scholarship from the University of Hawaii to becoming one of the youngest diplomats in the history of the American Board of Orthodontics – an esteemed designation few doctors ever achieve – this Southern California native and USC graduate, brings these same qualities and passion to the patients he treats.

Dr. Badii is founder and principal of Badii Orthodontics, which currently serves patients at three locations: Anaheim, Irvine and Torrance. The practice, which has grown purely from word of mouth and referrals from doctors,

is known for its supreme customer service and first-class patient care.

“Our goal is to create healthy, long-lasting beautiful smiles and faces,” says Dr. Badii. “We use state-of-the-art technology, from diagnosis to the actual appliances used during treatment. Because of these advanced techniques, many times we are able to cut normal treatment times in half.”

Treatment is offered in a friendly and comfortable atmosphere, with each location offering separate areas for adults and youth – complete with video games, movies and big screen televisions for the younger patients.

Patients, which range in age from 7 years old to adults, can choose from

several cutting-edge braces. Dr. Badii, for example, is one of a few doctors in the country licensed, certified and proficient in the use of lingual orthodontic braces, which are placed on the backside of the teeth and completely hidden from view. For youth who want to take their orthodontic braces from mild to wild, and have some fun in the process, Badii Orthodontics offers a unique alternative to traditional braces, which are available in a variety of shapes, including stars, hearts, Superman and many more.

“Orthodontics positively changed my life,” says Dr. Badii. “I want to provide the same experience for all my patients.” ■
